Activity 1: Introduction

As the Digital Marketing Strategist for EcoShop, my role is to develop and implement a strategic digital marketing campaign that strengthens the brand's online presence, increases brand awareness and drives measurable growth in online sales. EcoShop is a new online retail company specialising in sustainable and eco-friendly products designed to help consumers make more environmentally responsible choices in their everyday lives.

EcoShop offers a range of sustainable products, including reusable household items, eco-friendly clothing and biodegradable personal care products. The company is committed to ensuring that its products are ethically sourced and produced using environmentally responsible practices, with a focus on minimising environmental impact throughout the supply chain. EcoShop aims to appeal to environmentally conscious consumers who value sustainability, ethical production and transparency when making purchasing decisions.

What differentiates EcoShop from traditional online retailers is its strong commitment to transparency, environmental responsibility and positive social impact. In addition to offering sustainable alternatives, the company supports environmental causes and encourages consumers to adopt more sustainable lifestyles. EcoShop therefore aims to build more than a customer base; it seeks to create a community of consumers who are passionate about making a positive difference.

The digital marketing campaign will focus on increasing EcoShop's brand awareness, attracting qualified traffic to its e-commerce website and ultimately increasing online sales. To achieve these objectives, the campaign will incorporate Search Engine Optimisation (SEO), content marketing, social media marketing, PPC advertising, email marketing and data analytics. These strategies will be integrated to create a consistent digital customer journey, reach the appropriate target audience and address key marketing challenges through data-driven and strategic solutions.

Activity 2: SWOT Analysis

2.1 Complete the Analysis

Strengths	Weaknesses
• EcoShop has a strong and clearly defined brand identity centred around sustainability, transparency and environmental responsibility • EcoShop offers a wide range of sustainable and eco-friendly products. • EcoShop is committed to ethical sourcing and environmentally responsible practice. • EcoShop's commitment to supporting environmental causes and promoting sustainable lifestyles creates an opportunity to build a strong emotional connection with customers.	• EcoShop has limited brand awareness compared to larger competitors. • EcoShop's commitment to ethical sourcing and environmentally responsible supply chains may result in higher operating and sourcing costs. • EcoShop may face strong competition from established online retailers and well-known sustainable brands.
• Opportunities	**• Threats**

• The growing demand for sustainable fashion and personal care products allows EcoShop to expand its product range and customer base in this new era. • Growing consumer interest in sustainable products gives EcoShop an opportunity to attract a larger eco-conscious customer base, this can be done by resources shared and using social media and influencers to provide opportunities to increase brand awareness and engage directly with potential customers. • The continued growth of e-commerce and ensuring it is optimal allows EcoShop to reach customers across wider geographical markets, meaning they will not be limited to a certain area.	• Strong competition from established online retailers and sustainable brands could make it difficult for EcoShop to gain market share. • Higher prices for sustainable products may cause price-sensitive consumers to choose cheaper conventional alternatives. • Supply chain disruptions and increasing sourcing costs could negatively affect EcoShop's pricing and profitability. • Negative reviews, social media criticism or cybersecurity incidents could damage EcoShop's online reputation and customer trust. • Incorrect information from others could lead to misleading consumers into believing that a company is more sustainable than it really is.

2.2 Analysis Report

EcoShop SWOT Analysis Report

The SWOT analysis provides a foundation for developing a successful digital marketing strategy for EcoShop by identifying the internal strengths and weaknesses of the business, as well as external opportunities and threats. The strategy should use EcoShop's sustainability-focused identity to increase brand awareness, attract qualified website traffic and ultimately increase online sales.

EcoShop's strong brand identity, wide range of sustainable products and commitment to ethical sourcing can be leveraged to take advantage of the growing demand for sustainable products. EcoShop should communicate these strengths consistently across its website, social media, email marketing and advertising. Content marketing can include educational blogs, videos and social media posts about sustainable living, eco-friendly fashion and biodegradable personal care products. This will position EcoShop as a knowledgeable and trustworthy brand while attracting environmentally conscious consumers. Partnerships with relevant sustainability influencers can further increase reach and engagement.

EcoShop's limited brand awareness should be addressed through an integrated digital awareness campaign using SEO, PPC advertising, social media and influencer marketing. SEO-optimised product pages and blogs can attract consumers searching for sustainable products, while PPC campaigns can target customers with strong purchase intent. Social media campaigns and influencer collaborations can introduce the brand to new audiences and encourage engagement. EcoShop should also maintain consistent branding and messaging across all digital platforms to strengthen recognition.

The company's higher sourcing and operating costs can be addressed by communicating the value behind its products rather than competing primarily on price. Website content should clearly explain ethical sourcing, product quality and environmental benefits. Product bundles, loyalty incentives and targeted promotions could also provide additional value without weakening the brand's sustainability positioning.

EcoShop faces threats from established competitors, higher prices, supply chain disruptions and negative online feedback. To protect against these threats, EcoShop should differentiate itself through transparency, ethical sourcing and environmental responsibility. Building relationships with reliable suppliers and monitoring supply chain performance can reduce operational risks. Social media and review monitoring should also be used to identify and respond quickly to customer concerns.

Finally, EcoShop should ensure that all sustainability claims are accurate, specific and supported by evidence. Clear communication about sourcing and environmental practices can help prevent misleading information and strengthen customer trust.

Overall, the SWOT analysis indicates that EcoShop should focus its digital marketing strategy on building brand awareness, communicating its unique sustainability value, engaging eco-conscious consumers and creating a trustworthy online presence. SEO, content marketing, social media, PPC, influencer marketing, email marketing and analytics should work together to support sustainable business growth.

Activity 3: SMART Goals

	1. Increase qualified organic traffic to EcoShop's e-commerce website by optimising product pages and creating SEO-focused content around sustainable fashion, eco-friendly personal care and sustainable living. 2. Increase EcoShop's online visibility and engagement by creating educational sustainability content and using social media campaigns and relevant influencer partnerships to promote the brand and its products. 3. Increase online sales by using targeted PPC advertising, personalised email marketing, product promotions and abandoned-cart campaigns to convert website visitors into customers and encourage repeat purchases.
	1. Achieve a 20% increase in organic website traffic and improve the ranking of targeted sustainability-related keywords. 2. Achieve a 30% increase in social media engagement, including likes, shares, comments, saves and profile interactions, while increasing social media followers by 20%. 3. Achieve a 20% increase in online sales revenue and a 10% improvement in the website conversion rate.

	1. EcoShop can conduct keyword research, optimise product descriptions and website content, and publish regular blogs targeting consumers actively searching for sustainable products. Website performance can be monitored using analytics tools. 2. EcoShop can use its strong sustainability identity to create engaging content such as sustainable-living tips, product demonstrations, educational posts and information about ethical sourcing. Collaborating with relevant sustainability influencers can extend the brand's reach. 3. EcoShop can target consumers who have demonstrated an interest in sustainable products through PPC advertising and use email marketing to provide personalised product recommendations, promotions and reminders. Analytics will be used to monitor conversions, revenue and customer behaviour.
	1. Increasing organic traffic will help EcoShop take advantage of the continued growth of e-commerce and reach a larger audience of eco-conscious consumers, while building awareness of its sustainable product range. 2. This directly addresses EcoShop's weakness of limited brand awareness while taking advantage of growing consumer interest in sustainable products. It also strengthens the company's relationship with consumers who value sustainability and ethical consumption. 3. Increasing sales supports EcoShop's primary campaign objective while helping address the threat of higher sustainable product prices by communicating the value, quality and

	environmental benefits of its products. Email marketing can also support customer retention and repeat purchases.
	1. Achieve the 20% increase in organic traffic within the first three months of the campaign. 2. Achieve the engagement and follower targets within six months of launching the campaign. 3. Achieve the sales and conversion targets within six months of implementing the digital marketing campaign.

Activity 4: Buyer Personas

Use this table to create a well-rounded view of EcoShop's target customers, focusing on demographics, psychographics, behavioural insights, and customer goals. This information will help you guide your digital strategy effectively.

4.1 Persona 1

Category	Details
Persona Name	Sustainable Sarah
Demographics	
Age	Ages 25-35
Gender	Female
Location	Urban areas, such as big cities (e.g. Pretoria, Joburg)
Income Level	Middle class to upper class income bracket

Psychographics	
Values	Core values that align with EcoShop are seeking brands with sustainability values, prioritises transparency and uses recyclable packaging.
Lifestyles	Lives an active, modern and environmentally conscious lifestyle. Tries to make more sustainable choices in everyday life, such as using reusable products and avoiding unnecessary plastic. Enjoys shopping online and prefers convenient e-commerce experiences.
Interests	Interests related to EcoShop is sustainable and ethical fashion, Eco-friendly beauty and personal care, Sustainable home and household products ,recycling and reducing household waste, sustainable living and zero-waste ideas, focuses on health and wellness.
Pain Points	Difficulty finding genuinely sustainable brands because many companies make environmental claims without providing enough evidence. Greenwashing, which makes it challenging to distinguish genuinely sustainable products from products using sustainability as a marketing tactic. Lack of transparency about where products are sourced, how they are manufactured and what materials are used.
Buying Motivation	Supporting sustainability – She wants her purchases to have less negative impact on the environment. Transparency – She is motivated by brands that clearly explain where products come from, how they

	are made and their environmental impact. Health and wellbeing – Eco-friendly and biodegradable personal care products may appeal to her desire for healthier lifestyle choices
Behavioural Traits	
Shopping Preferences	Prefers online shopping because it is convenient and allows her to compare products and brands easily. Discovers new brands through social media, particularly Instagram, TikTok and Pinterest. Influenced by sustainability influencers and content creators when considering unfamiliar brands.
Buying Frequency	Monthly purchasing: Regularly purchases everyday sustainable products such as personal care items, household essentials and reusable products . Every 2–3 months: Purchases clothing, lifestyle products or higher-value sustainable items.
Decision-Making Process	Is influenced by influencer recommendations, eco-certifications, Price and value for money and Social media presence.
Marketing Insights	
Content Preferences	She prefers visually appealing and informative content that helps her make more sustainable purchasing decisions. Short-form videos, product demonstrations, sustainable lifestyle tips, educational posts and influencer reviews are likely to capture her attention on social media. She also values behind-the-scenes content that demonstrates ethical sourcing, recyclable packaging and transparent business practices

Engagement Style	Follows brands on social media to discover new products, promotions and sustainability content. Engages with influencer recommendations when the influencer appears authentic and knowledgeable. Subscribes to email newsletters when they provide useful content, personalised recommendations or exclusive offers
Customer Goals	Her ultimate goal is to live a more sustainable lifestyle by making informed and environmentally responsible purchasing decisions. She wants to find trustworthy brands that are transparent about their sourcing, production and environmental impact while offering high-quality, practical and affordable products. She wants to reduce her environmental footprint without sacrificing convenience, quality or style.

4.2 Persona 2

Category	Details
Persona Name	Family-centred Farah
Demographics	
Age	35-50 years of age
Gender	Female
Location	Suburban areas
Income Level	Middle to upper class individuals
Psychographics	

Values	She values sustainability, quality, family wellbeing and responsible consumption. She prefers durable, high-quality products that provide good value for money while reducing their environmental impact. She also values convenience and reliability, particularly when shopping online, and prefers brands that offer trustworthy information, good customer service and recyclable packaging.
Lifestyles	She leads a busy, family-oriented lifestyle and values health, wellbeing and a comfortable home environment. She enjoys spending time with family and friends, outdoor activities, gardening and discovering practical ways to live more sustainably. She prefers high-quality, durable products that provide long-term value and fit easily into her everyday routine. She also values community involvement and businesses that contribute positively to environmental and social causes.
Interests	She is interested in sustainable living, home and gardening, health and wellness, quality fashion and eco-friendly personal care products. She enjoys outdoor activities, cooking, family time and travel, particularly experiences that allow her to connect with nature. She follows lifestyle, home and sustainability content online and enjoys learning practical ways to reduce waste and make more environmentally responsible choices. She also supports local businesses, community initiatives and environmental causes.
Pain Points	Limited time – Has a busy work and family schedule, making it difficult to research sustainable products

	thoroughly. Difficulty finding trustworthy sustainable brands – Unsure which brands genuinely follow sustainable and ethical practices. Limited convenience – Sustainable alternatives may not always be easily available or have convenient delivery options. Poor online shopping experiences – Complicated websites, unclear product information, unreliable delivery or difficult returns can discourage purchases.
Buying Motivation	She wants to make responsible and sustainable choices without compromising on quality, convenience, practicality or value for money. May prefer natural, non-toxic or environmentally friendly personal care and household products. Interested in reusable, recyclable and biodegradable alternatives.
Behavioural Traits	
Shopping Preferences	Shops online to save time and avoid travelling to multiple stores. Compares products, prices, reviews and sustainability information before making a decision. Uses other customers' experiences to determine whether a product is reliable and worth purchasing. Looks for details about materials, sourcing, environmental impact, packaging and product durability.
Buying Frequency	She is likely to make regular monthly purchases of everyday products, with larger or less frequent purchases every few months. Her purchasing is generally planned and needs-based rather than impulsive.

Decision-Making Process	Uses other customers' experiences to assess quality and reliability. Prefers trustworthy brands with a positive reputation. Looks for durable, reliable and effective products. Consider whether the product justifies its price and offers long-term value.
Marketing Insights	
Content Preferences	Simple information explaining sustainability and how products benefit the environment. Videos or images showing how products work and how they can be used in everyday life. Blog articles and guides ;Useful content about sustainable households, eco-friendly personal care, fashion and family lifestyles.
Engagement Style	She would engage with EcoShop through a combination of newsletters, social media, educational content, reviews, promotions and sustainability initiatives, particularly when the content is useful, trustworthy and relevant to her everyday lifestyle.
Customer Goals	The end goal of this persona would be to make sustainable and environmentally responsible purchasing decisions for herself and her household, while maintaining quality, convenience and value for money.

Activity 5: Selecting Digital Marketing Channels

5.1 Channel 1

Digital Channel: Instagram

Justification: Instagram is suitable for EcoShop because it is a visual platform that allows the brand to showcase sustainable products, communicate its environmental values

and reach both buyer personas. It can appeal to the younger persona through lifestyle, fashion and influencer content, while also providing the older persona with practical sustainability information, product demonstrations and customer reviews. Instagram can help EcoShop build brand awareness, create trust and reach consumers interested in sustainable and ethical products.

Use: EcoShop will use Instagram to share Reels, Stories, product images, educational posts, sustainability tips, product demonstrations and customer reviews. Influencer collaborations and user-generated content will be used to increase engagement and build credibility. EcoShop can also use targeted advertising and Instagram Shopping to promote products and direct customers to the website. Interactive features such as polls, questions and competitions can encourage audience participation and strengthen customer relationships.

5.2 Channel 2

Digital Channel: Facebook

Justification: Facebook is suitable for EcoShop because it can reach both buyer personas, particularly the 35–50-year-old persona who may prefer practical, informative and trustworthy content. It also allows EcoShop to build a community around sustainable living and communicate directly with customers. Facebook provides opportunities to share detailed information, customer reviews and educational content while also supporting targeted advertising to reach consumers interested in sustainability and eco-friendly products. It also allows consumers to be a part of a community for the buyer persona 2.

Use: EcoShop will use Facebook to share educational posts, sustainability tips, product information, demonstrations, customer reviews and promotions. Longer-form content can be used to explain EcoShop's ethical sourcing and sustainability practices and build trust. Facebook Stories and short videos can showcase products and provide practical demonstrations. EcoShop can also use targeted Facebook advertising to reach specific audiences, promote products and drive traffic to the website. Comments, polls and

community discussions can encourage interaction and help EcoShop build long-term relationships with customers.

5.3 Channel 3

Digital Channel: Email Marketing

Justification: Email marketing is suitable for EcoShop because it allows the brand to communicate directly with both buyer personas in a personalised and convenient way. It can build long-term relationships with customers by providing useful information, product recommendations and exclusive offers. Email is particularly useful for the 35–50-year-old persona, who values practical information, trust and convenience, while the 25–35-year-old persona can be engaged through personalised recommendations, sustainability content and new product updates. Email marketing can also encourage repeat purchases and customer loyalty.

Use: EcoShop will use email marketing to send newsletters containing sustainable living tips, new product launches, product recommendations, promotions and information about the company's environmental initiatives. Personalised emails can be based on customers' interests and previous purchases. Automated emails can be used for welcome messages, abandoned-cart reminders, post-purchase follow-ups and repeat-purchase recommendations. EcoShop can also use exclusive discounts and loyalty offers to encourage repeat purchases. Email performance can be measured through open rates, click-through rates, conversions and unsubscribe rates.

Activity 6: Developing EcoShop's Content Strategy

6.1 Outline the Content Strategy

Blog Posts

EcoShop will use blog posts to educate customers about sustainable living and provide trustworthy information about environmentally responsible choices. The target audience includes both buyer personas, particularly consumers who research sustainability and products before making a purchase. Blog topics such as sustainable living tips, reducing waste and eco-friendly alternatives will provide practical information that customers can apply to their everyday lives. This aligns with EcoShop's mission by promoting sustainable lifestyles, increasing environmental awareness and providing transparent information that helps customers make informed decisions.

Product Descriptions

EcoShop will use detailed product descriptions to inform customers about the features, benefits and sustainability of each product and support purchasing decisions. These descriptions will target both buyer personas, especially customers who value quality, transparency, ethical sourcing and value for money. Information about materials, production methods, environmental benefits, packaging and product durability will help customers understand the product before purchasing. This aligns with EcoShop's mission by demonstrating transparency and responsible business practices while helping customers choose products that have a lower environmental impact.

Social Media Video Content

EcoShop will use social media videos to demonstrate products, educate customers and inspire sustainable lifestyle choices through engaging visual content. The videos will target both buyer personas, with lifestyle-focused content appealing to the 25–35-year-old persona and practical demonstrations and sustainability tips appealing to the 35–50-year-old persona. Videos can include product demonstrations, sustainable living tips,

behind-the-scenes content and customer testimonials. This aligns with EcoShop's mission by showing how sustainable products can be incorporated into everyday life while communicating the brand's commitment to environmental responsibility, ethical sourcing and transparency.

6.2 Sample Topics or Descriptions

- Blog Posts

1. "10 Simple Sustainable Living Tips for Everyday Life."
2. "Easy Ways to Reduce Waste at Home ."
3. "Reusable Food Wraps: A Sustainable Alternative to Plastic."

- Product Descriptions

Reusable Beeswax Food Wraps

Keep your food fresh while reducing your use of single-use plastic with EcoShop's reusable beeswax food wraps. Made with natural, eco-friendly materials, these wraps are a practical alternative to plastic cling film and can be reused multiple times. They are ideal for covering bowls, wrapping fruit, vegetables, sandwiches and snacks. Easy to clean and designed for everyday use, these durable wraps help reduce household waste while supporting a more sustainable lifestyle. Choose reusable food storage for a simple everyday swap that is better for the environment.

- Video Content:

1. "Easy Sustainable Swaps for Your Home" – Short-Form Video

A short Instagram Reel, Facebook video or TikTok showing 5 simple swaps that can make everyday household routines more sustainable. Examples could include replacing plastic food wrap with reusable beeswax wraps, disposable shopping bags with reusable bags, and single-use bottles with reusable alternatives. The video would be practical, easy to follow and visually engaging, helping both buyer personas see how small changes can support a more sustainable lifestyle.

Brand value: Promotes EcoShop's mission of reducing environmental impact and making sustainable living practical and achievable.

2. "See It in Action" – Product Demonstration

A short video demonstrating how one EcoShop product, such as reusable beeswax food wraps, is used in everyday life. The video could show how to wrap food, clean the wrap and reuse it, while briefly explaining its sustainable features and benefits. A clear call to action could encourage viewers to visit the EcoShop website to learn more.

Brand value: Demonstrates product quality and practicality while supporting EcoShop's values of transparency, responsible consumption and reducing household waste.

6.3 Explain Content Distribution

Website – Blogs and Product Descriptions:
The EcoShop website will be the main platform for publishing blog posts and product descriptions. Blogs will provide educational information about sustainable living, while detailed product descriptions will help customers understand the features, benefits and environmental aspects of products before purchasing. SEO-optimised content will help EcoShop attract organic traffic from consumers searching for sustainable products and advice. Internal links between blogs and product pages will encourage visitors to explore the website and move towards purchasing.

Instagram – Video and Visual Content:
Instagram will be used primarily for short-form videos, Reels, Stories and visual product content. Its visual nature makes it suitable for reaching the 25–35-year-old persona through sustainable lifestyle content, product demonstrations and influencer

collaborations. Interactive features such as polls, questions and comments can encourage engagement and direct users to the EcoShop website.

Facebook – Educational, Product and Video Content: Facebook will be used to reach both personas through educational posts, product information, videos, blogs and promotional content. It is particularly useful for reaching the 35–50-year-old persona with practical sustainability tips, customer reviews and detailed product information. Facebook advertising can also be used to target consumers based on relevant interests and behaviours.

TikTok – Short-Form Video Content: TikTok will be used to reach new audiences through short, engaging videos, such as sustainable lifestyle tips, product demonstrations and simple eco-friendly swaps. This platform can increase brand awareness by encouraging users to discover and share EcoShop's content.

EcoShop will use the website as the central source of detailed information, while social media channels will drive awareness, engagement and traffic back to the website. Blogs will attract and educate customers, product descriptions will support purchasing decisions, and videos will demonstrate products and encourage engagement. Using multiple channels allows EcoShop to reach both buyer personas while maintaining a consistent message centred on sustainability, transparency, ethical sourcing and responsible consumption.

Activity 7: EcoShop Content Calendar Template

Week	Blog Post	Email Marketing	Social Media Post(s)	Paid Ads

Week 1 **5-7 Oct 2026**	**Blog Title**: "10 Simple Sustainable Living Tips for Everyday Life." **Goal**: Educate and inspire readers to make simple, sustainable changes to their everyday lifestyles. **Publish Date**: Monday, 5 October 2026	**Email Subject**: "Start Your Sustainable Journey with EcoShop" **Goal**: Introduce EcoShop and share practical eco-friendly tips while directing subscribers to the new blog post. **Send Date**: Wednesday, 7 October 2026	**Platform**: Instagram & Facebook **Content**: Share 5 simple sustainable swaps through an engaging Reel and promote the new blog post. Notes:

Activity 8: Creating a Customer Journey Map for EcoShop

Customer Journey Map Template

By mapping the customer journey, you'll gain insights into how EcoShop can enhance each stage, ensuring a smooth experience that meets customer expectations and strengthens brand loyalty.

Stages	Touchpoints	Customer Goals	Potential Pain Points	EcoShop's Response
Awareness	Instagram, Facebook, TikTok, Pinterest, Google Search Ads, blog posts and influencer content.	Discover sustainable products and learn about EcoShop. Become aware of sustainable alternatives that can fit into everyday life.	Limited awareness of EcoShop; difficulty identifying genuinely sustainable brands; concerns about greenwashing; too much information online.	Use engaging social media content, educational blogs and targeted advertising to introduce EcoShop. Clearly communicate its sustainability mission, ethical sourcing and commitment to transparency.
Consideration	EcoShop website, product descriptions,	Research products, compare alternatives	Higher prices; unclear sustainability claims; concerns	Provide detailed and accurate product descriptions,

	blogs, social media, customer reviews, email newsletters.	and determine whether EcoShop is trustworthy and offers good value.	about product quality, durability and environmental impact; difficulty comparing products.	customer reviews, sustainability information and educational content. Clearly explain materials, sourcing, environmental benefits and product quality.
Purchase	EcoShop website, product pages, shopping cart, checkout, email promotions and paid advertisements.	Purchase a sustainable product through a convenient, secure and trustworthy online shopping experience.	Complicated checkout; delivery costs or delays; concerns about payment security; uncertainty about returns; price concerns.	Provide a user-friendly website, secure payment options, clear delivery and return information, transparent pricing and convenient checkout. Use targeted promotions and product recommendations to encourage conversion.
Post-Purchase	Order confirmation email, delivery updates,	Receive the product successfully, understand	Delivery delays; product not meeting expectations;	Provide order confirmations, delivery updates, product-care

	customer service, follow-up emails, product reviews and social media.	how to use it and feel confident about the purchase.	uncertainty about product care or use; difficulty contacting customer service.	information and responsive customer support. Send follow-up emails requesting feedback and reviews and provide useful information about using the product.
Loyalty	Email newsletters, loyalty offers, social media, personalised recommendations, promotions and environmental initiatives.	Continue purchasing from a trusted sustainable brand and make more environmentally responsible choices.	Loss of interest; competing brands; limited product variety; feeling that sustainability claims are not genuine.	Reward repeat customers through loyalty incentives, personalised recommendations and exclusive offers. Continue providing transparent educational content and involve customers in environmental initiatives to strengthen long-term relationships.

Activity 9: Identifying and Analysing KPIs for EcoShop

Complete the KPI analysis plan to evaluate campaign success and guide strategic adjustments. This plan will ensure EcoShop can maximise reach and engagement with its eco-conscious audience.

9.1 Key KPIs

Conversion Rates by Channel - EcoShop will track conversion rates from organic search, paid advertising, social media and email. This KPI shows how effectively each channel turns website visitors into customers. Comparing the rates will help EcoShop identify which channels are generating the most valuable traffic and where campaign improvements may be needed.

Website Traffic from Various Sources - EcoShop will monitor website traffic from organic search, Google Ads, social media and email campaigns. This KPI measures the ability of each channel to attract visitors to the website. It will help EcoShop determine which channels are generating the greatest reach and whether its SEO, paid advertising, social media and email strategies are successfully driving traffic.

Social Media Engagement Metrics - EcoShop will measure follower growth, likes, comments and shares. These metrics indicate how audiences are responding to EcoShop's social media content. Tracking engagement will help the company understand which content resonates with its buyer personas and adjust future posts to encourage greater interaction and brand awareness.

Email Performance Metrics - EcoShop will monitor email open rate, click-through rate and unsubscribe rate. These KPIs measure how effectively email campaigns attract attention and encourage subscribers to interact with EcoShop's content. The data can be used to improve subject lines, email content, calls to action and product recommendations.

9.2 Trend Analysis

Email marketing is currently the best-performing channel for EcoShop. It has the highest conversion rate at 5.0%, compared with organic search (4.2%), social media (3.0%) and paid advertising (2.9%). Although email generated only 900 website visitors, the high conversion rate shows that email traffic is more likely to result in a purchase or desired action. The 12% CTR also indicates strong engagement with the email content. Therefore, EcoShop should continue focusing on personalised emails, product recommendations and relevant promotions to maintain strong conversions.

9.3 Weekly Tracking Goals

Conversion Rate by Channel - Track the conversion rate from each traffic source weekly, this shows which channels are turning visitors into customers and helps EcoShop improve or allocate resources to channels that generate more conversions.

Website Traffic by Source - Monitor visitors from organic search, paid ads, social media and emails each week, this shows which channels are successfully driving traffic and allows EcoShop to adjust its marketing efforts where traffic is lower than expected.

Social Media Engagement - Track follower growth, likes, comments and shares each week, this measures audience interest and shows which content is creating the strongest engagement, allowing EcoShop to adapt future social media content.

Email Open Rate and CTR - Monitor weekly email open rates and click-through rates, this shows whether subscribers are engaging with EcoShop's emails and helps improve subject lines, content and calls to action.

9.4 Summary

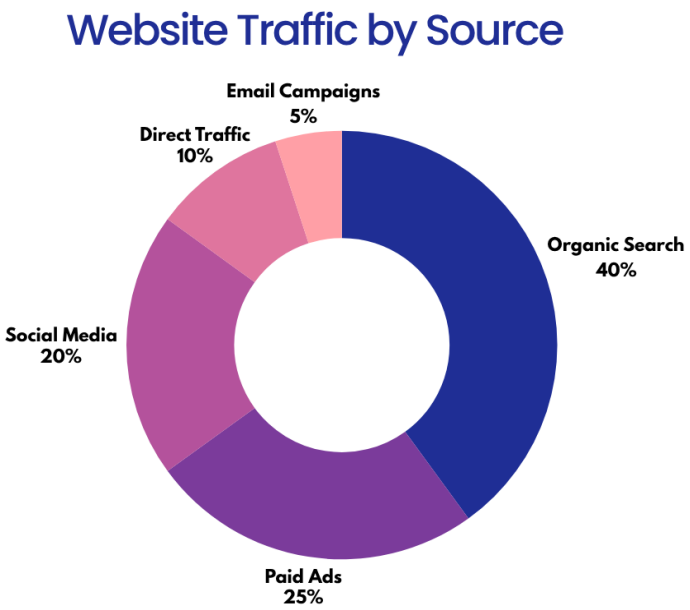

The most critical KPIs for EcoShop are website traffic, conversion rates by channel, social media engagement and email performance. Website traffic measures whether EcoShop is successfully increasing awareness and attracting visitors to its e-commerce website.

Conversion rates show how effectively this traffic is being turned into customers and directly support the goal of increasing online sales. Social media engagement, including follower growth, likes, comments and shares, measures audience interest and supports brand awareness. Email open rates and click-through rates indicate how effectively EcoShop is engaging its audience and encouraging them to visit the website. Together, these KPIs allow EcoShop to monitor traffic, engagement and conversions, ensuring that campaign performance remains aligned with its overall goals.

Activity 10: Identifying and Analysing KPIs for EcoShop

10.1 Website Traffic by Source (Pie Chart)

Chart:

Summary:

Organic search generated the most website traffic, with 5,000 visitors (40%), making it EcoShop's strongest traffic source. Paid advertising generated 3,000 visitors (25%), while social media contributed 2,500 visitors (20%). Direct traffic accounted for 1,500 visitors (10%), and email campaigns generated 1,000 visitors (5%).

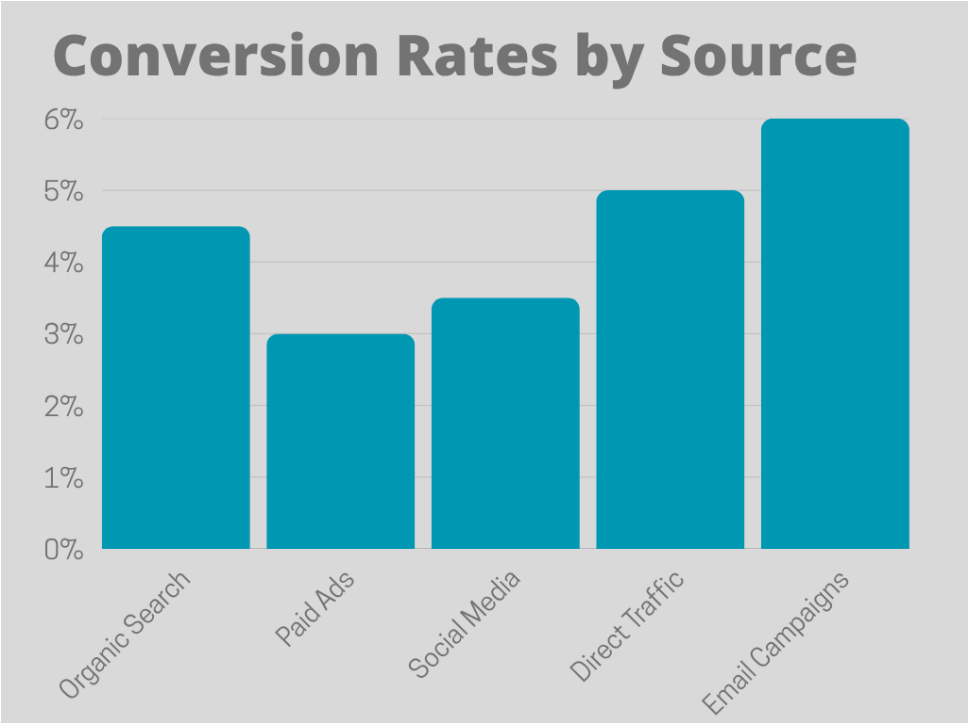

Recommendation:

Organic search generated the most website traffic, making it EcoShop's strongest traffic source. Based on these trends, EcoShop should continue investing in SEO by creating useful, keyword-focused content and optimising product pages to maintain organic traffic. Paid advertising should also be monitored and refined to ensure that traffic is cost-effective. Since social media contributes 20% of traffic, EcoShop could increase engaging content such as Reels, product demonstrations and sustainability

tips to encourage more website visits. Finally, email campaigns should be reviewed to identify ways to increase traffic, such as stronger calls to action, personalised recommendations and relevant promotions.

10.2 Conversion Rates by Source (Bar graph)

Chart:

Summary:

The data shows that email campaigns have the highest conversion rate at 6.0%, followed by direct traffic at 5.0%, organic search at 4.5%, social media at 3.5%, and paid advertising at 3.0%. This indicates that email traffic is the most effective at converting visitors into customers, while paid advertising currently has the lowest conversion performance.

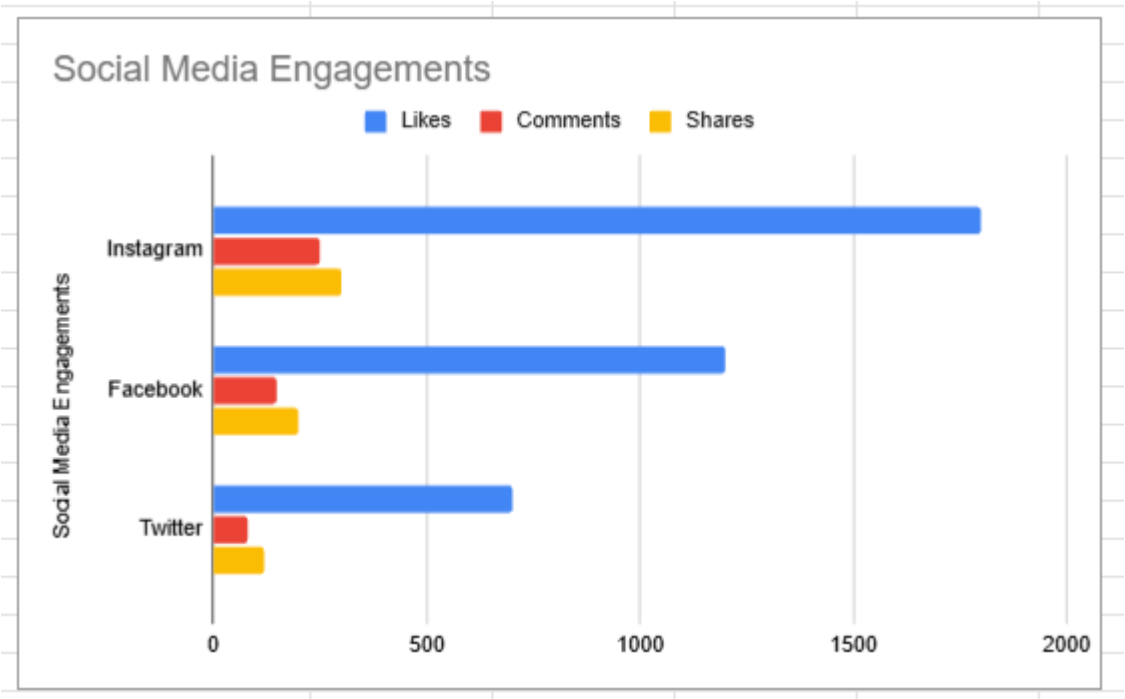

Recommendation:

EcoShop should therefore strengthen its email marketing strategy by using personalised product recommendations, targeted promotions and stronger calls to

action. Direct traffic should also be supported by building brand loyalty and encouraging repeat visits. For paid advertising, EcoShop should review its audience targeting, ad messaging and landing pages to improve conversion rates. Social media and SEO should continue to be used to attract and engage potential customers while encouraging them to complete purchases.

10.3 Social Media Engagement (Side-by-side chart)

Chart:

Summary:

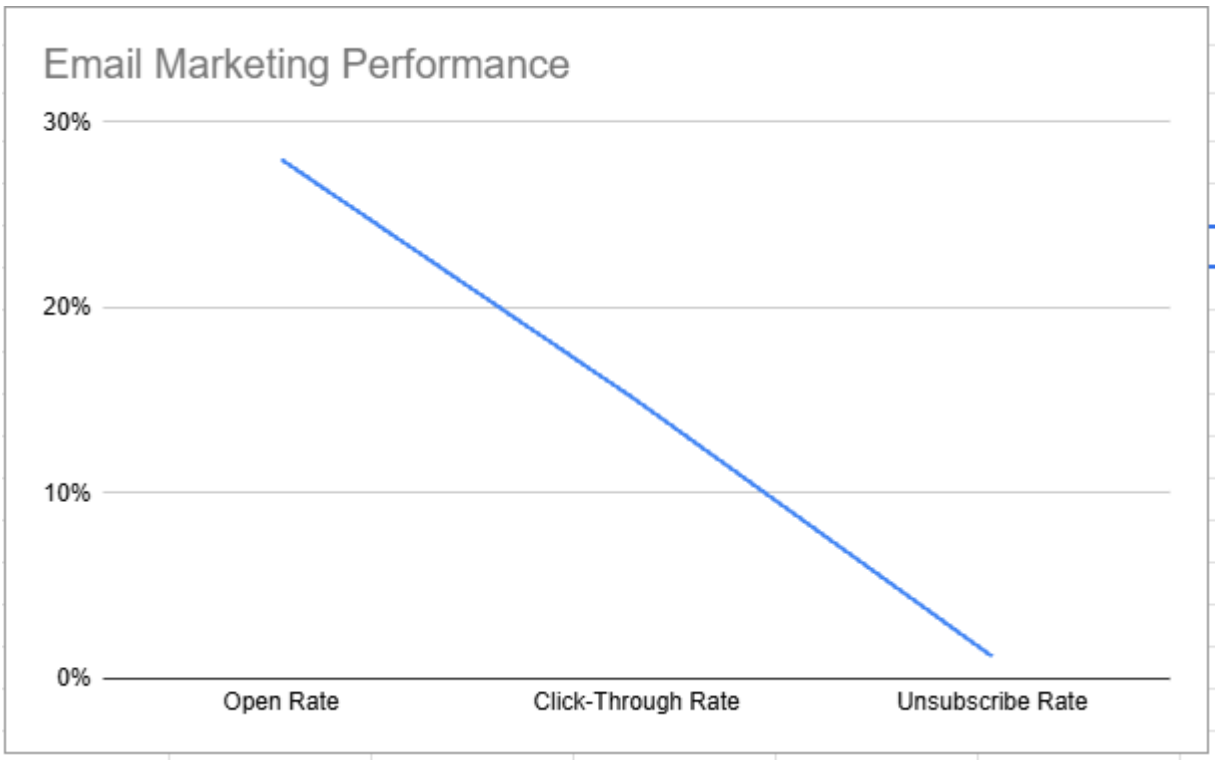

The data shows that Instagram has the highest overall engagement, with 1,800 likes, 250 comments and 300 shares. Facebook follows with 1,200 likes, 150 comments and 200 shares, while Twitter has the lowest engagement with 700 likes, 80 comments and 120 retweets.

Recommendation:

EcoShop should focus more on Instagram by creating engaging reels, product demonstrations, sustainability tips and interactive content. Facebook should continue to be used to reach and engage its audience, while Twitter can be monitored and its content strategy adjusted to improve engagement.

10.4 Email Marketing performance (Simple line graph)

Chart:

Summary:

The data shows that EcoShop's email campaigns are achieving a 28% open rate and a 15% click-through rate (CTR), indicating that subscribers are engaging with the emails and clicking through to the website. However, the 1.2% unsubscribe rate suggests that some subscribers may be losing interest or finding the content less relevant.

Recommendation:

EcoShop should continue using engaging subject lines, personalised content, product recommendations and clear calls to action to maintain strong engagement. The company should also review email frequency and content relevance to help reduce unsubscribes and retain subscribers.

Activity 11: Campaign Optimization

11.1 Optimization opportunities

Paid Ads - Improve ad targeting and landing-page relevance by targeting more specific high-intent keywords and directing users to relevant product pages. The ads are generating clicks but have a relatively low conversion rate, suggesting that the traffic may not be sufficiently qualified or the landing page may not match the user's expectations.

Email Campaigns - Use stronger, personalised calls to action and clearer offers within emails. Strong open rates show that subscribers are interested enough to open the emails, but improving the CTA and personalisation could encourage more recipients to click through.

Social Media - Adapt Facebook content to include more engaging formats, such as videos, product demonstrations, polls and questions. Instagram is generating stronger engagement, while Facebook is underperforming. More interactive and visual Facebook content could encourage greater audience participation.

11.2 Monitoring Plan

Over the next week, EcoShop will monitor the impact of each optimization by comparing the new results with the previous campaign data.

- Paid Ads: Track the conversion rate, CTR and cost per conversion in Google Ads. EcoShop will determine whether improved targeting and more relevant landing pages are turning more clicks into customers.
- Email Campaigns: Monitor the CTR, open rate, conversion rate and unsubscribe rate using email analytics. EcoShop will assess whether stronger calls to action and personalised content encourage more subscribers to click through to the website.

- Social Media: Analyse Facebook likes, comments, shares, follower growth and website clicks and compare them with previous results. EcoShop will determine whether more interactive content improves Facebook engagement.

At the end of the week, EcoShop will compare the results against the previous week's performance. If the KPIs improve, the optimisation will be continued. If performance does not improve, EcoShop will make further adjustments to the relevant channel.

Activity 12: Reflecting on EcoShop's Campaign Success

Campaign Success

The strategies that were most effective were SEO, email marketing and social media. Organic search generated the highest website traffic at 5,000 visitors (40%), showing that SEO and relevant content were effective at attracting visitors. Email marketing achieved the highest conversion rate of 6.0%, demonstrating that email was particularly effective at turning website visitors into customers. Instagram also generated strong engagement, with 1,800 likes, 250 comments and 300 shares, making it an important channel for building awareness and interaction with the target audience. An unexpected positive result was the strong performance of email marketing, as it generated less traffic than other channels but achieved the highest conversion rate.

Challenges and Solutions

One challenge was that paid advertising generated a high number of clicks but had a relatively low conversion rate of 3.0%. To address this, the campaign focused on improving ad targeting, using more relevant keywords and directing users to appropriate landing pages. Another challenge was that Facebook engagement was lower than Instagram engagement. EcoShop responded by considering more interactive content, including videos, polls, questions and product demonstrations. Email campaigns also required optimisation because, although the open rate was strong at 28%, the CTR of 15% indicated that there was still an opportunity to encourage more

clicks. Stronger calls to action and personalised content were identified as ways to improve performance.

Learning and Growth

The campaign improved my understanding of how different digital marketing channels work together to achieve campaign objectives. I developed a stronger understanding of using KPIs such as website traffic, conversion rates, social media engagement, email open rates and CTR to evaluate performance. I also learned that high traffic does not necessarily mean high conversions, making it important to analyse the quality and behaviour of visitors. The campaign strengthened my skills in data analysis, KPI tracking, content planning, audience targeting and campaign optimisation. Most importantly, I learned how data can be used to make informed marketing decisions rather than relying only on assumptions.

Future Recommendations

For future campaigns, EcoShop should continue investing in SEO and email marketing, as these channels produced strong results. More resources could also be allocated to Instagram because of its high engagement levels. Paid advertising should be tested and refined further by experimenting with different audiences, keywords, advertisements and landing pages. EcoShop could also test different email subject lines, calls to action and personalised offers to improve CTR and conversions. Regular A/B testing and weekly KPI monitoring should be used to identify which strategies produce the best results.

Personal Growth

This campaign has strengthened my interest in digital marketing strategy and campaign management. Working with EcoShop allowed me to see how areas such as SEO, social media, email marketing, paid advertising, content creation and analytics connect within one campaign. I have become more confident in interpreting marketing data and using it to identify opportunities for improvement. The experience has

encouraged me to pursue roles where I can combine creativity, strategic planning and data analysis to develop and optimise digital marketing campaigns.
